

So Many Colours

Sub Focus

Rain

All the lights are crashing from above like rain
See the shadows falling perfect on your face

And I can't look away
And I can't look away
And I can't look away
Look away, look away 'cause

Every colour I see in your eyes
Pulling me close as they come alive
So many colours that I can see in your eyes tonight

Every colour I see in your eyes
Watching em go as they touch the sky
So many colours that I can see in your eyes tonight

So many colours
So many colours I see in your eyes
So many colours
So many colours I see in your eyes

So many colours
So many colours
So many colours

So many colours I see in your eyes
Pulling me close as they come alive
So many colours that I can see in your eyes tonight

So many colours I see in your eyes
Watching em go as they touch the sky
So many colours that I can see in your eyes tonight

See in your eyes tonight

So many colours
