

# Time

## Sub Focus

Losing your way, you can't find it  
I know you stumbled off track  
Got out of your lane, slipping sideways  
It's not too late to get back

So when you think you're gonna fall  
Just don't look down  
When your back's against the wall  
We'll turn things round

Have we still got time?  
Have we still got time?  
Have we still got time?  
Have we still got time?  
Have we still got time?  
Have we still got time?

This one's for the late night  
This one's for the sunrise  
For when those dark clouds break  
This one's when you realize  
Red lights over skylines  
This one's a brand new day

Out of the rut there's no fighting  
Keep stepping over the cracks  
With every touch I feel lighter  
We've come too far to go back

So when you think you're gonna fall  
Just don't look down  
When your back's against the wall  
We'll turn things round

Have we still got time?  
Have we still got time?  
Have we still got time?  
Have we still got time?  
Have we still got time?  
Just don't look down  
Have we still got time?  
We'll turn things round
