

Headfirst

Sub-Radio

Headfirst into something new
But we're not getting there with that attitude
So come on, come on, it can't get worse
Take a deep breath
Headfirst

Walk around in the house where you were born like a ghost
You run your fingers through my hair and I try to casually laugh at your jokes
We can talk about it later
We can work it out
Focus on the way the words come tum-tum-tumbling out of my m-m-m-m-mouth

If you want to leave
You only have to say
Ah
I'm pretty sure there's something in the water
But I don't want to think about it

Headfirst into something new
But we're not getting there with that attitude
So come on, come on, it can't get worse
Take a deep breath
Headfirst

So come on, come on, it can't get worse
Take a deep breath
Headfirst

Our love is the smell in the air right before it rains
Going down in an earlier round but I can take a beating, oh I can take the blame
We can talk about it later
We can work it out
Focus on how comfortable my name is tumbling out of your m-m-m-m-mouth

If you want to leave
You only have to say
Ah
I swear to God there's something in the water
But I don't want to think about it
(I don't want to think about it)

Headfirst into something new
But we're not getting there with that attitude
So come on, come on, it can't get worse
Take a deep breath
Headfirst

So come on, come on, it can't get worse
Take a deep breath
Headfirst

I think there's something in the water
Pretty sure there's something in the water
I think there's something right there in the water
I think there's something right there beneath our feet

I swear there's something in the water
It's obvious there's something in the water
We all know that there's something right there in the water but
I don't want to think about it
(I don't want to think about it)

Headfirst into something new
But we're not getting there with that attitude
So come on, come on, it can't get worse
Take a deep breath
Headfirst

So come on, come on, it can't get worse
Take a deep breath
Headfirst
