Baring your back
I'll sink my fingernails until they crack
Splinter your epidermis
Look at me
With cavities
Irises disappear before I lean

Into your face and your heartbeat races
Our minds decay, as desire betrays our
Reasoning
I can't believe
I want you more than just your bad company

I have become
Everything you hate
Everything you hate
I feel so numb
I can't feel your pain
I can't feel your pain

Baring your back
I'll sink my fingernails until they crack
Splinter your epidermis
Look at me
With cavities
Irises disappear before I lean

Into your face and your heartbeat races
Our minds decay, as desire betrays our
Reasoning
I can't believe
I want you more than just your bad company

I have become
Everything you hate
Everything you hate
I feel so numb
I can't feel your pain
I can't feel your pain

Our glossolalia
I'm watching your lips
You're speaking in tongues
Again
Our glossolalia
You're sparing my witts
I can't seem to comprehend...
