

Safer

SUD

Just say goodbye
To all your inhibitions
You'll be alright
Cause I'm just here to stay

Never had a doubt
Never had a fear
You can be warm with me tonight
You'll be safer when you're here

When you feel the world is on your shoulders
When things don't go your way
Come on and step a little closer
Because your safer with me now

Forget about tomorrow
We'll get away and disappear
'Til the rain has stopped
For pouring all those tears

Gone are the days of sadness
They'll save you from the rain
And you can be warm with me tonight

When you feel the world is on your shoulders
When things don't go your way
Come on and step a little closer
Because your safer with me now

Safer...
