

Jubilee

Suede

We're the sun that lights the sky
We're the winter in your mind
The love that lives inside
We're the litter on the breeze
We're the winter in your mind
The words that sit inside

When you run with me
Do you feel human?
And you come with me
Come take my hand

We're the season like the trees
And they're falling in your mind
The sun that lights inside
We're the world that spins a line
And the winter in your mind
The sun that lights the sky

When you're done with me
Do you feel human
And you come with me
Come take my hand

And you feel with me
And you feel human
And you come with me
Come take my hand

And you run with me
Do you feel human
And you come with me
Come take my hand

And you feel with me
And you seem superwoman
And you come with me
Come take my hand
