

Somewhere Between An Atom And A Star

Suede

Life is just a moment
And words are just a trick
And I wish there was more of life than is given to us
Like the rain that's washed away
It's almost gone now

One day it all will be uncovered
One day it all will be uncovered
One day it all will be revealed to me

Somewhere between an atom and a star
I'll find a way out to float away
Somewhere between an atom and a star
I'll find a way out to float away
Somewhere between an atom and a star
I'll find a way out to float away

Between an atom and a star
Between an atom and a star
You will find me somewhere
