

# Lost In The World

Sufjan Stevens

A voice of air's melliflence  
Draconian will, superstition  
Now go arise, awake your dead  
An angel fell, one Heaven sent  
The Beaufort scale measured the gales  
I saw the world between two sails  
The water climbed over the sky  
As miracles demystify

All that was lost in the world  
Yeah, I've been lost in the world

How do we all make it through?  
Caught in thought, daydreaming like I do  
Just like you, when you told me all your dreams would come true  
Well I hope you're right, and they always do

An optical indifference  
Parallel realms of existence  
Cosmologies apocalypse  
Your premonition's persistence

For all that was lost in the world  
Yeah, I've been lost in the world

How will we all make it through?  
Caught in thoughts, daydreaming like I do  
Just like you, when you told me all your dreams would come true  
Well I hope you're right, and they always do
