

# STAR

suggi

The stars, the moon, we'll hold each other together  
You're my, you're my star  
At my first sight I was lost in your eyes  
My beatitude's out the shell that it cries  
Heaven's reached out in a long long while  
You're my, you're my star  
So infatuated as the time goes by  
Only choosin' you till the last one dies  
If I were to die for you I'd do it twice  
We're just like  
The stars, the moon, we'll hold each other together

You're my, you're my star  
I'll be right there  
When you come around  
In the dark  
When there's nobody around  
When you're lost  
I'm the moon to your star, star, star, star

Star  
When you stray  
Don't go very very far  
In the dark  
When there's nobody around  
When you're lost  
I'm the moon to your star, star, star, star

Scars  
I can never try to take my own advice  
It's hard to let it show when I've been livin' in disguise  
Hope you know now, yeah I'm not that wise

Far  
I stay close, I'm too scared to go far  
I've always been terrified of the high  
But when I'm with you I'm already flying

If you feel like livin' is a whole other curse  
I'll be with you on your way to another universe  
When we're better we can always come back to earth  
I love you so much, I can't put it into words  
The stars, the moon, we'll hold each other together

Till the end of time  
You're my, you're my star  
I'll be right there  
When you come around  
In the dark  
When there's nobody around  
When you're lost  
I'm the moon to your star, star, star, star

Star  
When you stray  
Don't go very very far  
In the dark

When there's nobody around  
When you're lost  
I'm the moon to your star, star, star

Star  
Star  
Star, when you're lost, I'm the moon to your star, star, star, star  
Star  
Star  
Star, when you're lost, I'm the moon to your star, star, star, star
