

Newport Reds

\$uicideboy\$

(Triple six, triple six, triple six, triple six...)

Well it's that Black \$uicide coming in the 3rd degree
Yung \$carecrow walking around with the dope and serving fiends
That H-U-S-T-L-E
Grey*59 my family
I'm screaming "triple 6!"
Satan, please come and intervene

I'm smoking the Cali, the kushy, the purple, the widow
Promethazine, codeine, that's laced on my indo
The message is coded through all of my windows
I'm stuck in a limbo in a world of benzos...
Feeling extravagant
Feeling inhabitant
Devil's the advocate
Pills are the sacrament
Chasing it all with 8 ounces of Actavis

(Triple six, triple six, triple six, triple six...)

Like 12 am in the morning
I'm off that shit sleep back go back sleep
Once again on the benzos, I take the valium, I'm walkin' away
As soon as in complete control again
Levitation came through my skin
While I'm faded and feel the love again
Shredded
Quit 'til I sit and see how much life still so full of shit
Then again, I'm unraveling stuff
Twisting and dragging
Since hypnotizing my mind at 6:30
Minutes before I knew the new ground was kicked and on his wave
Here I go again

(Triple six, triple six, triple six, triple six...)

Oddy keep on popping all these pills
I got a problem, I can't stop it
All these toxins in my blood
I am the flood
I am the butterfly splattered upon the windshield of a car going 100 miles a
n hour
Bitch, I'm sour from all these emotions
Leave me floating
Ain't no coward
About to blow my head open
Watch my blood shower the pavement
Waiting for these drugs to save me, but they made me
So I thank thee for what I've become
A dumb motherfucker on the run
