

Flesh

suisside

Love me in my car, you can leave me rest
Feeling in my gut, tells me you ain't the same
Caught up with my tongue, now it's all damn pretty
Feeling all the spots, that we love to decay
Keeping it control, but the harder it gets
Keep it on the low, I ain't telling a things
Now the minutes, I keep your hand out of sight
I'm the one that loved you and everything's dead

Kill me with you, take my hand in the rain (in the rain)
Keep me with you, when I'm nothing but flesh
Countless visions, but it's not like you said
Like you meant it, I'll just forget it tonight

Coming with my hand in my shirt, you can leave it in the past
You gonna kill for a word (you gonna kill for a word)
Cool off with my hand on a blunt, I'ma smoke it till I pass
I don't care if you call (I don't care if you call)
I'm not the one, you're looking for me through your window
You'll never find me intact
I'm not the one, you're looking for me when the wind blows
I'm out in the middle the night

Love me in my car, you can leave me rest
Feeling in my gut, tells me you ain't the same
Caught up with my tongue, now it's all damn pretty
Feeling all the spots, that we love to decay
Keeping it control, but the harder it gets
Keep it on the low, I ain't telling a things
