suicide

I'll kill these motherfuckers then I'm going to rest
Hoe keep coming cause I'm getting some shits
I teach you motherfuckers how to be like the rest
I'm cooking up a storm for the blood in my bed
See me like no other, now you're coming my way
I'll throw you in the water before you get in my face
Shinning so you see the things I made by myself
I'll be fucking creeping on the way to my death

You know that you'll bleed for me
Tell her get some dope and then bring it to me (bring it to me)
She the only one I see, she be taking it wrong and now she fear
ing for me (fearing for me)
You're the one who runs and they're coming for you
I don't wish you well if we ain't fucking with you
She can run away like the drugs in my room
I'ma run away like the things that I do

All she do is talk to me, I don't feel your touch, even when yo
u're around (when you're around)
She be all soft with me, if we're too far away then I promise w
e'll break (promise we'll break)
Keep me in your arms for weeks
I'll put the sun away and I promise in the dark you'll be safe
You can show it all to me
When we're coming down
You'll be the only one that I hate
