

Better

Summer Salt

You always said you'd stick around
But there you go running around town
I tried to let you back inside
My life but you've had too much to hide
And I'm still hurting

You know this game has gotten old
That's why your story starts to unfold
When I get back up you seem to kick me down
And it drives me crazy baby
Ahhhh

You never wanted me to find out
You always told me wrong
You never really want to come back
You left us here for so long again
I'm always trying to find a way out
I realized I'm doing really well
With you I'm better without

Better, you always said its better
Better when were together
I think I'd rather have you send a letter
Better, take time in stormy weather
Wish you well on your endeavors
I just know you won't be back here forever
It drives me crazy lately
Ahhhhh

You never wanted me to find out
You always told me wrong
You never really want to come back
You left us here for so long again
I'm always trying to find a way out
I realized I'm doing really well
With you I'm better without
