

## Going Native

Summer Salt

Mother, I haven't been well  
Search through my life and I think it's time for me  
It's time, it's time to embrace this part of me  
Lost can take a little while on a long journey

So come on, come on, laughin', I will be there with my brothers  
and then  
Love is the answer to most of my questions - you can't comprehend  
And if I get back to the real world, I'll be back in time for you

Sister, tell me what's new  
I've been going native for months since I've been missing you  
Missing you grow, missing the world you hold so closely  
To keep from being alone, a world we call our home

So come on, come on together sit down right here with my sister  
and friends  
History cherishes lifetimes upon us - sing if you wish  
And if I get back to the real world, I'll be back in time for you

Come on, come on, laughin', I will be there with my sister and  
friends  
Love is the answer to most of my questions, you can't comprehend  
And if I get back to the real world, I'll be back in time for you
