

Waiting around for waves
I'll wait round for days
Shakin' fear from under my pillow
While I wake to Neptune's billow

Thundering through bars
I chase him through bumper cars
Good grit I've come to my senses
I've fallen over the fence

Through drawn drapes
Into my dreamscape
I fake way through the coming storm
Far marooned
I've been defeated
I guess you're just what I needed

When you're gone
I lay so low you'd never know I was home
Go run so far from me
Go burry your bone
And when I turn around
You were there all along

Waiting around for waves
I'm counting down the days
Your shark tooth won't chew at my window
While I brine in Neptune's billow

Hunkered down ya dart
I chase you in my bumper car
Good grit I've come to the feeling
I'm way in over my head

Through drawn drapes
Into my dreamscape
I fake way through the coming storm
Far marooned
I've been defeated
I guess you're just what I needed

When you're gone
I lay so low you'd never know I was home
Go run so far from me
Go burry your bone
And when I turn around
You were there all along

When you're gone
I lay so low you'd never know I was home
Go run so far from me
Go burry your bone
And when I turn around
You were there all along
