

Patch Your Jacket

Summer Salt

Roll your barrel dear
You've gone and made your way
Your way through the end
Patch your jacket
You're clean and classic
Can't be beat
Left alone in the lead

Wave your wicked wing
I've seen you cutting corners
Ever since you hit land
Hang out with me
We'll keep it easy
Start again
They can't take that away

There was no easy way out then
People saying time
Is what it takes to see the light when
All you want is understanding
But all you need is a friend
So I've taken to riddles in roving
Taken aback
Oh just to get to where I'm going
There's no more use in pretending
So when you cut round again

Go and wave your wicked wing
I've been right in your corner
Ever since you hit land
Hang out with me
We'll keep it easy
Start again
They can't take that away

Well I've been bowed down
Feeling low
But I'm ready to hit the road
Got nowhere to go
When the sun's
Setting over the west end
I'll be gone
Cause I'm ready to hit the road
Know just where I'll go
Ain't goin' home

Roll your barrel dear
You've gone and let your hair down
Waved your way through the end
Patch your jacket
You're clean and classic
Start again keep it easy
Start again keep it easy
Start again keep it easy
Start again keep it easy

Start again

They can't take that away
