

Space Exploration Disaster

Sunflower Bean

In the year two thousand and thirteen
No one can hear you scream

Float away from the planet
(Float away from the planet)
Float away from the planet
(Float away from the planet)
On a [?] sensation
(Float away from the planet)
Float away from the planet
(Float away from the planet)

In the year two thousand and thirteen
This is the year when it all come clean

Float away from the planet
(Float away from the planet)
Float away from the planet
(Float away from the planet)
At a million miles an hour
(Float away from the planet)
Float away from the planet
Float a [?]
(Float away from the planet)
Float away from the planet
(Float away from the planet)

All the men were calm on the ship
'Cause they knew it would be quick
All the men were calm on the ship
As the anticipation hits
And I pray to God to send them an angel
And I pray to God to send them an angel
And they got down on their knees
And asked the Baby Jesus, "Please"
But God just turned His head away

Float away from the planet
(Float away from the planet)
Float away from the planet
(Float away from the planet)
Float away from the planet
(Float away from the planet)
Float away from the planet
