

Want You to Miss Me

Sunny Sweeney

Each day that goes by gets easier on me
Weight of this goodbye used to bring me to my knees
I'm getting stronger, it's been enough time
I'm not crying any longer, but the truth is baby I

Still wanna cross your mind in the middle of the night
Still want your heart to sting when you close your eyes
Wanna take your breath away every time you hear my name
Baby, it's cruel, so please forgive me
I don't want you back
I just want you to miss me

I'm looking forward to when I can look back
And wish you well and wish you happiness
It's something I hold on to, and I hate it that I do
I want you to think about me the way I think about you

Still wanna cross your mind in the middle of the night
Still want your heart to sting when you close your eyes
Wanna take your breath away every time you hear my name
Maybe it's cruel, so please forgive me
I don't want you back
I just want you to miss me

I don't wish that I never loved you
But the truth is I'd do it all again
I just wanna stick around and haunt you
So, you don't forget about the love that we had

Still wanna cross your mind in the middle of the night
Still want your heart to sting when you close your eyes
Wanna take your breath away every time you hear my name
Baby, it's cruel, so please forgive me
I don't want you back
I just want you to miss me
I just want you to miss me
