

# Running Man

Sunset Sons

There's a sign of how our lives  
Are so silently designed  
That we get so little time  
So come on

How long will I be your running man  
How long until you understand  
This life happens while we're making plans  
What's wrong, we're catching lining in our hands

I will run with you in my lungs  
Until we can't breathe any more  
But if I stumble and the world takes over  
Will you put your foot to the floor

We could run from home  
But we'll keep, keep moving on  
We could run from home  
But we'll keep, keep moving on  
We could run from home  
But we'll keep, keep moving on  
We could run from home  
But we'll keep, keep moving on  
We could run from home  
But we'll keep, keep moving on

There has been so many times  
That's been howling through my mind  
Then I taste the air outside  
I belong

I will run with you in my lungs  
Until we can't breathe any more  
But if I stumble and the world takes over  
Will you put your foot to the floor

How long will I be your running man  
How long until you understand

We could run from home  
But we'll keep, keep moving on  
We could run from home  
But we'll keep, keep moving on  
There's no place like home  
But when all your friends have gone  
It's not like when we were young  
When those summer lights go low

Was that sound of our love song  
The pieces and times  
And now that they say it's all gone  
Same places, same passport  
Same places in the stars  
Come on in, it's only begun

We could run from home  
But we'll keep, keep moving on  
We could run from home  
But we'll keep, keep moving on

We could run from home  
But we'll keep, keep moving on  
We could run from home  
But we'll keep, keep moving on
