

Hold the Night

Sunstorm

I'm still waiting for a change
Like when the summer ends
And leaves start to fall again

I'm ready to leave behind
All of the promises we broke
Before outlast goodbye

I know that times will shift
And I'll be here to make
The best of me
And show the man that I will be

We can hold the night
Let our pain go
We can hold on to forever
We might change our minds but
Everything will remain the same
Hold the night

I keep coming back at us
Back to the bond we had but now
It's all gone and lost

I need to turn the page
Leave all hurt to yesterday
Set to switch the game

I know that times will shift
And I'll be here to make
The best of me
And show the man that I will be

We can hold the night
Let our pain go
We can hold on to forever
We might change our minds but
Everything will remain the same
Hold the night

I'm only a man
I can make mistakes
I don't wanna bare the weight of
This pain alone no more

We can hold the night
Let our pain go
We can hold on to forever
We might change our minds but
Everything will remain the same
Hold the night
