

I Will Remember

Sunstorm

I walk alone and your
Eyes see what I do
I hear your voice in the
Darkest nights

You hold me up when
I am down to pieces
You take my hand and
Show me where I should go

In the longest ride you know
I will remember
No need to hide my stormy weather
You will catch me every
Time when I fall
You're my deepest call you know
I will remember

Every time you pull me from my
Saddest places
You take my hand and show me
Where I should go

In the longest ride you know
I will remember
No need to hide my stormy weather
You will catch me every
Time when I fall
You're my deepest call you know
I will remember

I sit and wonder
Who I am and what I can be
I know the answer lies within

In the longest ride you know
I will remember
No need to hide my stormy weather
You will catch me every
Time when I fall
You're my deepest call you know
I will remember
