

## In & Out (Fire)

Sunstorm

I keep calling in my dreams  
Your name, I've tried  
to forget but my mind  
always stucked to those days  
When you and I were reality  
When I open my eyes  
I feel the wave of time rolling on me  
In the blink of an eye  
You know I will always be there

All the time we had is now so far away  
Every moment lived without you, empty and bare  
You just need to call my name  
I'm leaving the game through the high and lows

In & out fire  
I'm on the run  
Underneath the midnight sun  
In & out fire  
I'm on the run  
Just take my hand and follow  
Can't you see the way you look at me  
And take away the dust from your eyes  
And leave the world behind?  
The future calls our names  
In & out fire

Through the twist and turns of fate  
I'll face the battles that are yet to come  
When the story's yet untold  
I'll chase down my dreams  
A fire never heals

In & out fire  
I'm on the run  
Underneath the midnight sun  
In & out fire  
I'm on the run  
Just take my hand and follow  
Can't you see the way you look at me  
And take away the dust from your eyes  
And leave the world behind?  
The future calls our names  
In & out fire

All the time we had is now so far away  
Every moment lived without you, empty and bare  
You just need to call my name  
I'm leaving the game through the high and lows  
In & out fire  
I'm on the run  
Underneath the midnight sun  
In & out fire  
I'm on the run  
Just take my hand and follow  
Can't you see the way you look at me  
And take away the dust from your eyes

And leave the world behind?  
The future calls our names  
In & out fire

All in a moment life's turning  
Away to the darkest colours  
All in a moment life's turning  
Its hard...I cannot deny

In & out fire  
I'm on the run  
Underneath the midnight sun  
In & out fire  
I'm on the run  
Just take my hand and follow  
Can't you see the way you look at me  
And take away the dust from your eyes  
And leave the world behind?  
The future calls our names  
In & out fire
