

# Hit and Run

## Super Furry Animals

History just fades to insignificance  
Listen to what I've got to say  
Now what would you do  
If you were in my shoes? Tell me  
Previously to this I had no adventure  
Life was just a Jurassic lark  
Now what would you do  
If it happened to you? Tell me  
Hit and run, blow my mind  
Get it together, leave your future behind  
DNA, make my day  
Found the key to a parallel universe  
Found the key to a parallel universe  
Don't tell me I've lost it  
Gone, gone, gone, gone, gone, gone, gone  
Found the eggs one night up by the quarry  
Then I hid them underneath of my bed  
If I only knew  
For I had not a clue, now I've  
Pterodactyls flying 'round my attic  
They were incubated by the boiler  
They're green with some blue  
What on earth will I do? Tell me  
Hit and run, blow my mind  
Get it together, leave your future behind  
DNA, make my day  
Found the key to a parallel universe  
Found the key to a parallel universe  
Don't tell me I've lost it  
Gone, gone, gone, gone, gone, gone, gone  
Will the dinosaurs come back and haunt us?  
I've a bet down fifty-to-one  
And with the money maybe  
One day I'll build my own  
Parallel university  
With a park and good facilities  
For all who enroll  
Glyndwr would be so proud  
He never got around  
To build one himself  
Although he planned to do so, told his kids so  
Hit and run, blow my mind  
Get it together, leave your future behind  
DNA, make my day  
Get it together, leave your future behind  
Hit and run, steer blind  
Get it together, leave your future behind  
DNA, make my day  
Found the key to a parallel universe  
Found the key to a parallel universe  
Don't tell me I've lost it  
Gone, gone, gone, gone, gone, gone, gone, gone
