Do you wanna see me dance?

Are you satisfied with your boring life?
I already know, you, who is full of lies

A well-done routine, an answer that can't be found anywhere
Since when did I discover you were a liar?
Try saying "This is fine"
You'd be surrendering to living out days with no purpose
I don't need you to pretend that you're strong
You just have to discover your heart
While questioning, words that hurt the feelings are shaking intensely
Holding my breath, looking at the monitor
Pretending to be an adult seemed to have had no meaning
That heart, that voice, expose it all

If you want to find out your true face, polygraph polygraph
Don't hide it more, tell me, polygraph polygraph
So say right now say right now
Yes or no? Yes or no?
Don't hide it more, tell me, polygraph
I always wanna make you laugh

A fantasy without shape
As if you're having a party throughout infinity
On the stairs leading to no destination
Encourage yourself and move forward, darling
What kind of encounter is out of the ordinary?
Become honest, rise up
Dancing immediately, look, even blinking
Feels regrettable, honey

A la la la la la
Overcome the invisible wall, come on
A la la la la la
Throw away that heavy bag, hey

If you want to find out your true face, polygraph polygraph
Don't hide it more, tell me, polygraph polygraph
So say right now say right now
Yes or no? Yes or no?
Don't hide it more, tell me, polygraph
I always wanna make you laugh

Are you satisfied with your boring life? (Just make you laugh)
I already know, you, who is full of lies

Concealed in your body
Something new (You don't know about it too)
Towards a dramatic tomorrow

Let's jump in, more more
Will you let me take you high?

If you want to find out your true face, polygraph polygraph
Don't hide it more, tell me, polygraph polygraph
So say right now say right now
Yes or no? Yes or no?
Don't hide it more, tell me, polygraph
I always wanna make you laugh

Are you satisfied with your boring life?
There's no way that's true, you want to have fun, right?

(Please, tell me)
