No school today

Superbus

You're sixteen, you're late at school You don't like working, I understand, it's cool You have a band but you haven't found a name You're not the same that's what your parents say

What about your life, before to be a rockstar What about your life, before to be a rockstar You say: no way I won't go to school Today what about the rules
No more teachers, no more work
I'm leaving with my band around the world
No way I won't go to school
Today what about the rules

You told your friends you wanted to leave They said "it's crazy", what are you doing? But they don't know, they really don't know What's happening on stage when your doing the show

What about your life, before to be a rockstar What about your life, before to be a rockstar You say: no way I won't go to school Today what about the rules
No more teachers, no more work
I'm leaving with my band around the world
No way I won't go to school
Today what about the rules
No more teachers, no more work
I'm leaving with my band around the world

No way I won't go to school
Today what about the rules
No more teachers, no more work
I'm leaving with my band around the world

No way I won't go to school
Today what about the rules
No more teachers, no more work
I'm leaving with my band around the world
