

Car Crash

Supergrass

Tunnel vision
A cracked mirror
Just like a, a cold killer
You show no emotion
It sounds weird
Like a broken guitar
Taillights coming out of the night
And reaching up like a ghost from twisted metal

Can't dance with myself
I look round to my girlfriend
Finite's alright
The stop sign, I didn't see it
Pressed into my hand
A white line through my good friend
All-night car crash
The stop sign, I didn't see it

flowers
A small constellation
But somehow you never even saw it coming
But I can't make, take this forever

Can't dance with myself
I look round to my girlfriend
All-night car crash
The stop sign, I didn't see it
Pressed into my hand
A white line through my good friend
All-night car crash
Snow white, snow white through you head

All-night car crash
The stop sign, I didn't see it
All-night car crash
The stop sign, I didn't see it
