

With You

SuperM

Like the sun that hangs above the sky
I wanna see us falling you and I
Like the ocean gives away the breeze
I wanna ride your wave and be your tide

What you are is what I wanna know
Your hand is asking mine for it to hold
This is all we're ever gonna need
The youngest hearts are never getting old

I don't wanna overthink about this
Can I take some time?
Make you reach what's on my mind

I don't wanna have to get around this
Can we just go through?
It's a better way that we can move

I'm not tryna fit in with everybody
Not tryna tick with the daily talk
I just wanna get lost

Tryna chase that feeling, replace bad feelings
With days wrapped up in the moments like this
Tryna chase that feeling, erase those ceilings
Inside I'm reeling for moments like this
With you
With you
With you
With you

Like the moon that glows up in the night
I tend to glow when you are by my side
I thought I'd drop the ball and overthink
If you are wrong for me, I won't be right

Your love is red when I am feeling blue
The feeling's falling never felt so new
I make art but you're the masterpiece
Angels do exist 'cause you're the proof

So, I don't wanna overthink about this
Can I take some time?
Make you reach what's on my mind

I don't wanna have to get around this
Can we just go through?
It's a better way that we can move

I'm not tryna fit in with everybody
Not tryna tick with the daily talk
I just wanna get lost

Tryna chase that feeling, replace bad feelings
With days wrapped up in the moments like this
Tryna chase that feeling, erase those ceilings
Inside I'm reeling for moments like this

With you
With you
With you
With you

I'm not tryna fit in with everybody
Not tryna tick with the daily talk
I just wanna get lost

Tryna chase that feeling, replace bad feelings
With days wrapped up in the moments like this
Tryna chase that feeling, erase those ceilings
Inside I'm reeling for moments like this
With you
With you
With you
With you
