

# Burn The Night

Superman Is Dead

The reason I run away, we're gonna burn the night  
The reason I sing this song, we're gonna burn the night

Dress to kill, my shoes are slick now, get on the bike this is  
the time yea  
Speed up the game with no direction, who would understand  
Welcome to life that we've been given, we are the criminals of  
time yea  
And with the dream that wont surrender, let the fire burn again  
in the sky

nanananananana

Sick of the world, the saints are falling, we walked the street  
s with gasoline  
Then we find love in the dark side of life, it's ok my friend  
True to your heart, there's nothing stronger than the bullets o  
f your mind  
Burn up the night

Burn up the night, tonight will be alright coz I've got you, mi  
llions of you and me  
Lit up the dream, our tattooed soul will spit the night again,  
in love and hate we rise

There was a time in this little town, we thought the world's go  
nna be ok

There was a time that we live with falling stars  
There was a time in this little town, we thought the world's go  
nna just fine  
And now the time is up, tonight!  
There was a time in this little town, we thought the world's go  
nna just fine  
And now the time is up, tonight!  
The reason I run away, we're gonna burn the night

The reason I sing this song, we're gonna burn the night  
The reason I look like this, we're gonna burn the night  
Burn the night  
nanananananana

The reason I run away, we're gonna burn the night

The reason I sing this song, we're gonna burn the night  
The reason I look like this, we're gonna burn the night  
Burn the night  
nanananananana

I say I've got to go another place another to burn  
I say I've got to go another place another to burn  
I say I've got to go another place another to burn  
I say I've got to go another place another to burn
