

Fly Away

Superman Is Dead

If I could understand the breath you take
If I could understand the way you speak
And I wish I could travel by the road
That crosses to your mind

I know that you will never want to cry
I know that you came in such a disguise
And when the stars are watching us tonight
I will be leaning on the golden sky

Never let you fight alone against the heat
Cause we're gonna have no more time to loose
Having no time we will...

Fly away... Through the edge of the world
Close to fly away... Through the edge of the world
Fly away... Raise up your hands high into the sky
They wind up your heart that holding you tight

If I could spread my wings to touch your dreams
If I could paint your smile to shine my eyes
I know you got a heap of golds and pearls
, No reason to die for

I have to sing a song to make you dance
New melodies bring you much strength in life
I'll come to take shelter in the chain of light
Cause we're gonna have no more time to loose
Having no time to loose...
Having no time we will...

Stronger than the rainbows

Stronger, stronger, stronger, stronger
Leaving silly clouds of sorrow
