

# Solar System

## Superorganism

Welcome to a journey into our solar system  
(Cool) Press the button to begin  
(Hahaha) This is the planet, Pluto

Solar system, help me out (Solar system, help me out)  
They voted, now I don't belong  
Can you believe it?  
I look to you for guidance  
Frightened and guilty  
Will you take my request tonight  
And help me out?

Help me out  
Help me out  
Help me out

I've never felt this lonely  
Come on and hold me  
Solar system, help me out  
Hold me with your velvet  
Shiny planets  
Solar system, help me out

Gaze into the darkness of endless space  
Time curves and twirls, shattering one's ego  
Changing is forever (Hey, that's pretty good)

Cool, you went insane (Cool-cool)  
What's the weather like in your brain?  
You're saying that I'm your last chance  
Shaking your fist into the sky  
You seem to think I'm a god or  
Something really grand and gold  
Well, maybe if you make it here alone  
I'll help you out

Help me out  
Help me out  
Help me out

I've never felt this lonely  
Come on and hold me  
Solar system, help me out  
Hold me with your velvet  
Shiny planets  
Solar system, help me out

Solar system, help me out  
I've never felt this lonely  
(Solar system, help me out)  
Solar system, help me out  
(Solar system)

Help me out  
Help me out  
Help me out  
Help me out

(Solar system)

We first flew in 1903  
And on the moon by 1969  
Life passes in a blink of an eye  
There's no harm in giving it a try
