

Inheritance of Decency

Support Lesbiens

Maybe they wanted to live decently
Maybe they wanted to be descended
But without risk you might try it only once
And if you fail you no longer admit
One side of mind feeling like inheritance
And that's what you believe
One side of mind being like a true heart
We will not try to prove this fact
Once I had a girl and she came up on to me
And I have believed
Next time the thing was off her head
What's on your mind could it be crawling up to eat you
What's on your mind that's adoring all this true threat
What is on your mind today
We're begging you shouldn't have no longer care
What is on your mind today
That makes you tired and makes you sweat all day
What is on your mind today
And is there all god dam day
What is on your mind today
We're begging you should no longer care
What is on your mind today
And is there all god dam day
So won't you come on
Don't you see I'm there
What's on your mind that's adoring your head
So would you feel excused nobody move
So would you feel excused nobody loose
So would you let them pay if they refuse
I'm so bad man 'cause
So long been using my mind
I feel just like a clown
'Cause I've never really found anything
So long it seems liker a dream
But no longer within
A lifetime we've spent upon our bodies here
So long
Been using my mind
But never found anything
Because I'm tall enough for you boy
