

Take another night drive
Trying find what you will never know
Scales of truth get rusty
We all wonder where it goes
Long way to hell ever longer back
But you all seem to lost your self respect
God damned it so let go
Everything that made you so
'Cause we would like to know about the feelings
When you're really down
And everybody knows about this business
Everybody trys
'Cause we would like to know about the real thing
As everybody chose
Everybody trying to have a big head
Everybody grows
Don't wanna big head
Don't wanna think it trough
Don't wanna feel bad
Don't wanna pick on you
Everybody knows about the business
Everybody's right
'Cause we can't find the reason of the wanting
So everybody fights
Don't wanna big head
Don't wanna think it trough
Don't wanna feel bad
Don't wanna pick on you
And everybody knows about the business
Everybody trys
'Cuase we would like to know about the real thing
That everybody chose
Everybody knows about the business
So everybody's right
'Cause we can't find the reason of the wanting
Everybody fights
Také another night drive
Trying find what will never know
Scales of truth get rusty
We all wonder where it goes
Long way to hell even longer back
But you all seem to lost your self respect
