

Shake It

Support Lesbiens

Take it, never gonna fake it
Endeavour you carry on
I disbelieve you, no one left to preach to
But you were never God
Do you want to go on with this?
Do you want to like all it means?
Forsaking all that you love
In all of your hearts and minds
Thinking over your love
At what age does this come to me?
At what age it comes to

Shake it, never think you'll make it
When it all begun
I want to believe you when you say you know me
Where does the blame come from?
Because I never before
Not want to be on my own
Do you wanna come back and stay and lay down?

Do you wanna walk over me?
Do you wanna go on and see?
I thought you'll want to now
What do you say when it comes to love?
I may just want to go on my own
At what age does this come to me?
At what age it comes to

Shake it, never think you'll make it, yeah
Will take us into the unknown
Believe you when you say you know me, yeah
Shake it, never think you'll make it
When it all begun
I want to believe you when you say you know me
Where does the blame come from?
Because I never before
Not want to be on my own

Shake it, never think you'll make it
When it all begun
I want to believe you when you say you know me
Where does the blame come from?
Because I never before
Not want to be on my own
Do you wanna come back and stay and lay down?
