

# Another Life

Surf Mesa

I hate where we left off  
We probably should have left it on  
There never was a right time  
This world without you just feels wrong  
Oh, I still got your name on the tip of my tongue  
I still got your face on the front of my phone  
I know we both decided to leave it alone  
And we probably should

In another life if you came over  
We'd say all the things we wish we said  
In another life maybe we're older  
We won't have to lose this love again  
'Cause I still got these feelings for you, darling  
Hitting me like waves right in my chest  
In another life if we start over  
When the stars align I'll meet you then  
In another life

I heard when it's real love  
Come back when you let it go  
And baby, all this distance  
It's only made my feelings grow  
I still got your name on the tip of my tongue  
I still got your face on the lock on my phone  
I know we both decided to leave it alone  
And we probably shouldn't

In another life if you came over  
We'd say all the things we wish we said  
In another life maybe we're older  
We won't have to lose this love again  
'Cause I still got these feelings for you, darling  
Hitting me like waves right in my chest  
In another life if we start over  
When the stars align I'll meet you then  
In another life

Come over  
Come over  
Come over  
In another life  
Come over  
Come over  
Come over  
In another life if you came over  
We'd say all the things we wish we said  
In another life  
In another life
