

When I Hold You In My Arms

Surface

Lately I feel your changes, what once was real is feeling how
I've tried to act this all things were same
When you call my name you're so close yet far away

When I hold you in my arms, I'm not sure you're there
We don't talk like we used to, I just don't want our love to end

So many days have come and gone, so many nights are sleeping alone
Wondering if I wake up and see you right here with me
Tell me that I'm having the bad dream

When I hold you in my arms, I'm not sure you're there
We don't talk like we used to, I just don't want our love to end

Deep down inside (down inside) I know that this could be
That in the one I hope with last for all times
So if I miss a line or 2, please understand I don't wanna be alone again

When I hold you in my arms, I'm not sure you're there
We don't talk like we used to (ooh) I just don't want our love to ever end

I love you
