

A Long Time

Surfaces

Oh, keep your head by my side
As we walk across the West Coast light
I'll be yours at every mile
And the road goes on for
A long long time
A long time
A long long time
A long time

Yeah, take a chance fall in love
Leave it all on the run
Shed some light on your mind (Yeah, yeah)
Take a turn, maybe twice
Find yourself, roll the dice
Leave a breath in your life
You know you can't be locked up with love
You gotta find it like the first hand finds touch
It's never blinding, top-down, lookup
It's all requited, it's always timing

Oh keep your head by my side
As we walk across the West Coast light
I'll be yours at every mile
And the road goes on for
A long long time
A long time
A long long time
A long time

If I break down with you by my side
Then it's all alright, it's all alright
It might be dark but I got your light
So it's all alright, it's all alright
'Cause I know these miles are for the taking
You know my mind is full of patience
new road. This life it's liberating
My heart is racing, you got me saying

Keep your head by my side
As we walk across the West Coast light
I'll be yours at every mile
And the road goes on for
A long long time
A long time
A long long time
A long time
