

## Little Green Eyes

Surfer Girl

Under early June star light  
Get closer lemme hold you all night  
I'm well aware I had to make you mine someday  
But I don't know how I let your little green eyes, take over my  
life

Well excuse me, ms lady  
Ain't gonna run up much of your time  
I was thinking  
We should link and  
Vibe to some Reggae music  
And some drinks yeah

I know you hear it often  
But those eyes don't lie  
Can hypnotize a man like me  
No time to play shy guy  
Can't let another  
Take a shot before I do

Every day keeps getting better...  
I'll be down in any weather...

Under early June star light  
Get closer lemme hold you all night  
I'm well aware I had to make you mine someday  
But I don't know how I let your little green eyes, take over my  
life

I've been talking bout you to all my friends  
They keep saying that I'm diving off the deep end  
But they ain't never felt love like this I bet  
They ain't never felt love like this I bet

I knew that this would last, yeah I knew off rip  
Now I been seeing double, man I need to get a grip  
I ain't never felt love like this real shit  
I ain't never felt love like this real shit

Every day is getting better...  
I'll be down in any weather...

Under early June star light  
Get closer lemme hold you all night  
I'm well aware I had to make you mine someday  
But I don't know how I let your little green eyes, take over my  
life
