

Smoking in the morning
Blazing like the sunrise
Smoking in the morning with you (with you)
Nothing's more important
We're moving counter-clockwise
Nothing's more important than you
When it comes to me, anything goes
Just tell me how you feel
I'm here to ease, anything wrong
And I know you keep it real (keep it real)
So fire it up, moving slow
Diamonds and riches, they come and they go
There ain't ever enough time in the day for us
So fire it up, bring it in close
You and me got nowhere to go, so

Smoking in the morning
Blazing like the sunrise
Smoking in the morning with you
Nothing's more important
We're moving counter-clockwise
Nothing's more important than you
And when it comes to me, anything goes
Just tell me how you feel
I'm here to ease, anything wrong
And I know you keep it real
So fire it up, moving slow
Diamonds and riches, they come and they go
There ain't ever enough time in the day for us
So fire it up, bring it in close
You and me got nowhere to go, so

Smoking in the morning
Floating on the ceiling
Never coming down with you
Smoking in the nighttime
Weightless in the evening
Dreaming in the darkness with you
And when it gets too cold
Well Imma burn it up, burn it up, too old
Well Imma change it up, change it up, too good
Well there's never enough with you
And When it comes to me, anything goes
Just tell me how you feel
I'm here to ease, anything wrong
And I know you keep it real
So fire it up, moving slow
Diamonds and riches, they come and they go
There ain't ever enough time in the day for us
So fire it up, bring it in close
You and me got nowhere to go
