

Let It Die

Survive Said The Prophet

We'll rise until we fall
We'll rise to take a stand
We'll fight until we fall
We'll rise until we die
Let it die

City lights flashes lines
Passing by the traffic signs
That told me where to go
And where I needed to be

Facing time or being alive
Every second counting
Down and up our lives
As we are in control

So what we fall sometimes
So what we fall sometimes
Keep on heavy breathing
Can't you feel you need this too?

So what we fall sometimes
So what we fall sometimes
If we don't try then it will always stay impossible

We'll rise until we fall
We'll rise to take a stand
We'll fight until we fall
We'll rise until we die

These nails we've pounded on this stable ground
Gave us foundation to just overcome
If you take control of doubt
You'll find your way back home

The string of hope at the end of the tunnel
May be the fuse to set the echo and rumble
Destroy, rebuild or let it die
Just let it die

We'll rise until we fall
We'll rise to take a stand
We'll fight until we fall
We'll rise until we die

We can start this riot
Seek our way amongst this world
We can start this riot
Seek our way amongst this world
We can start this riot
Seek our way amongst this world
We can start this riot
(Riot! Do it! Rise)
Let it die

We'll rise until we fall
We'll rise to take a stand

We'll fight until we fall
We'll rise until we die
We'll rise until we fall
We'll rise to take a stand
We'll fight until we fall
We'll rise until we die
