

Is there anybody in there?
Smoking weed with God
Or are you hiding out with guns somewhere?
I highly doubt that
Why so much trouble?
When we live in such a remarkable place

It comes in waves
It'll knock you off and drown you
If you can't get past the break
So just ride it out
The sun comes up, the sun goes down
And that's what it's all about

I went out surfing
With some of my friends from high school
The sun came out there with dolphins
Swimming around too

Is there anybody out there
Controlling the tides?
Tell me why there's so much trouble?
When we live in such a remarkable place

Hey, it comes in waves
Shit will knock you off and drown you
If you can't get past the break
So just ride it out
The sun comes up and the sun goes down
That's what it's all about

Why there's so much trouble?
When we live in such a remarkable place

It comes in waves
It'll knock you off and drown you
If you can't get past the break
So just ride it out
The sun comes up and the sun goes down
And that's what I'm talking about
