

## Clarity

Suuns

You got lost and then you found  
Every thought that kept you bound  
But now that you can see  
Will you change your mind?

Have the stars gone let you down?  
But now you know what it's all about  
Is it too late to leave  
And change your mind?

No more, distortions, you can hear  
I feel that you're used to it  
See so clear  
No more distortions, no more fear  
Don't spin this universe  
A love I feel so near

What's this? The stars that light the sky that keep on shimmering  
Hey kid, what do you think you're doing? Are you even listening?  
You are too, 'cause I know you've seen it too

Release yourself, remove this shroud  
'Cause what you see when you look around  
Clarity so real, don't change your mind

No more distortions, no more fear  
Don't you get used to it?  
A love I feel so near
