

Doreen, sing to me with your eyes and let me see you  
Doreen, take off your disguise and let me near you  
I guess I've always known  
That you don't exist at all  
But one night I'd like you to stay  
The closer I get the further away

Doreen, come to me in my dreams and then you leave me  
Doreen, the more that I see the more I need you  
I know I'm off and on  
When I think I've lost control  
But one night I'd like you to stay  
But the closer I get, the further away  
The closer I get, the further away  
The closer I get, the further away
