

When Friends Fall Out

Sweet

When friends fall out
It's not the end of the world
When friends fall out
The flames won't burn in the cold
You can't hide from the lies
No matter how hard you try
When friends fall out
It's not the end of the world

Look into the mirror what do you see
The shadow of a man you used to be
Drowning in the tears of you self pity
When friends fall out
It's not the end of the world
When friends fall out
The flames won't burn in the cold
Empty words are to blame
You know it;s just a crying shame
When friends fall out
It's not the end of the world

When you face the future you look into the past
And dreams of yesterday are over too fast
But castles in the sand never last
When friends fall out
It's not the end of the world
When friends fall out
The flames won't burn in the cold
You can't hide from the lies
No matter how hard you try
When friends fall out
It's not the end of the world
