

Future Ruins

Swervedriver

We are ruled by fools
These are future ruins
Rocket fuel
Force-fed rules

If I could only get my head around it
And if you could just place your legs around me

Relics fleeced
You f*cked up the peace
Furies rise
A filthy prize

If I could only squeeze my hands around them
And if you could just hold them down

Surround them
Astound them

Flip the news
Reject the blues
Forever raze this filthy phase

If I could only set my sights upon you
And if you dispose your arms around me
Surround me

We are ruled by fools
These are future ruins
That the king is insane
Is now old news
