

## Captured

### Swimming with Dolphins

Eternity has only just begun  
I breathe it in like the very first breath of my lungs  
I was older back when I was young  
You were waiting for me with a smile  
Invited me in, asked me if I'd like to stay a while  
All the pain I caused was reconciled  
You got me down on my knees  
My heart is yours and I am captured  
A thousand words I wish I would have said  
A thousand things I wish I could do over again  
But you are now and all of that is then  
Like all the times of rain that never pass  
Like all the endless summers that came and went so fast  
One moment in your presence is far greater than all the past  
You got me down on my knees  
My heart is yours and I am captured  
So wrap your love around me  
I wanna stay inside this rapture  
If I can feel it in my hands  
Then it will turn to sand  
Take what I pursue  
Just let it all fall through  
As long as I've got you  
As long as I've got you  
You got me down on my knees  
My heart is yours and I am captured  
So wrap your love around me  
I wanna stay inside this rapture  
You got me down on my knees  
My heart is yours and I am captured  
So wrap your love around me  
I wanna stay inside this rapture
