Yo Prev (what's up)
I'm thinking man; we don't always have to talk about
dungeons and dragons all the time, you know? (hmmm)
We don't have to make things so complicated (no doubt)
Let's take this back and show them how we can do this too (word)

Deep, I'm using canyons you can't get by the cannon (no way) Season veterans, the hawk has landed Toxic tandem, the docotorum of mad men The planet of apes is now a main attraction How does it happen? If I knew I'd tell ya They'd probably try to say I worshiped devils in the cellar It's just a slight of hand, like Penn and Teller The mighty dollar, is taller than the scholar Ask your neighbourhood martyr about the fire starter People are driven to buildings when I let it out my system Built my the hands of man and women Thinking of quitting? Now's the time There's more job opportunites at the back of the line Applications, and registrations Feels more like an investigation Now how's that for a demonstration
