

ASTROBOY

SXMPRA

Break a face

Astroboy

Astro boy break a mothafuckin' face
I'm comin from a very cold and empty place

Hear that bass and the pace get braced for a taste

Outer space is a deep and a dark mistake

Cause you never know what's gonna end up comin to replace

Every face that belongs to the human race

Extra terrestrial tendencies takin the mace from its place and I'm catching
a case

Lurkin in the backstreets like a mothafuckin menace

Catchin' bodies bitch I meant it take a photo and I sent it to be put up on
a fence

Feds gonna find a little present in a barrel with some rotten fuckin heads

Keepin all these pussy boys up out my way with a mag or ten

I am an alien not from this plain bitch I said this shit once and I'll say i
t again

Imma put him in a hearse and doom his spirit with a curse

Send em down to hell so motherfuckers gotta do the worst

Pick apart a pussy boy and show em what he's fuckin' worth

I'm a demon I'll be evil till I'm 6 feet in the dirt

Bitch what's that

In the mothafuckin back

Its a body and its ready to be put out on the track

Shovel that
Never lack
Bodies stack
I relax

Watch me go and get it like I popped it with a gat

Bitch I'll take that fuckin soul
Pull up out the gate and I and I'm about to roll
Straight to your sector with the blade my soul is sold my coal is cold
I thought you'd know

Ignite the fire within with a lighter I

Skim over petrol and light up your life I have been in line of the sight of
the ones that have spite but I know who is right

Bitch I'm

Never gonna let em drag my name up in the dirt I am a man of many words I'm
leaving motherfuckers hurt

Thinkin boutta way to get em back I gotta prey on all that lack so imma reel
em in and throw their bodies back to the black

Dressed in black on black I think it's time you were attacked

Wait a minute while I grab my clique and all their blood soaked deadly fucki
n' bats

Stalk in the night like the shadows we hike and reside like the mice in the
crevice confined to the darkness within that is lining our minds and the fea
r of outside is the fear that divides all our brothers and sisters from seei
ng the light till the devil unites with us during the night and we seek out
the weak just to start ending lives

I am alive but I've still fucking died
