

Wait For You

Sylar

Should've let you in
I keep pushing away all the things that I love again
I still taste your skin
As I lay all alone in the room that I left you in
Now I'm stuck in the darkness
Living with the fact I can't finish what I start with
I got rid of all the shit inside this apartment
And somehow you're the only thing that I couldn't part with

And I'll wait for you
If you wait for me
Through the longest night
I'm still on your side
And I'll wait for you
If you wait for us
Till we both collide
On the other side
I'm not giving up, up, up on you
Say you won't give up, up, up on me

Dial 1, 2, 3
I keep checking my phone in hopes that you're calling me
And I just can't believe
I keep picking the scabs and revealing what's underneath
Now I'm stuck in the darkness
Living with the fact I can't finish what I start with
After all these years I've become so heartless
And I'm so sick

And I'll wait for you
If you wait for me
Through the longest night
I'm still on your side
And I'll wait for you
If you wait for us
Till we both collide
On the other side
I'm not giving up, up, up on you
Say you won't give up, up, up on me

Sick, sick
I'm so sick
Sick
I'm so...
