

# No One's Allowed

Sylvan LaCue

No doubt  
Can I bond with a million and one things coming out of my mouth?  
Seems like everything's going down south  
Can I imagine things a little better?  
6'2" nigga that's lacking in attitude  
The full force is lining this latitude  
He's really nice, he's all about what he's gonna do  
Never be in groove what can I do  
To pursue something they thought that I would never do?  
John Travolta, guess just Be Cool  
Cause any ignorant gesture will mess up  
My career before it even much starts  
Shall I depart from this sickening? to advance causing broads and not live hard  
Cause everybody on the television screen is living the dream and showing it off for the scene  
Too crazy, nigga the game shady  
4080, Q-Tip persuade me  
Never be long but I stay strong like Akon in the ghetto with bundles of Napa  
lm

From a place that you never seen  
Eyes wide but I lied if I said that I never dream  
In a league of my own, ain't on any team  
Kansas boy didn't fit in with the? scene  
But they knew I was coming like a senior beam  
You got the ground, watch your head for the guillotine  
Huh, and I'm me on everything  
So I'm out front with my music like caroling  
And I swear I will never leave  
I'm about to make the rap game unawaring  
Behind the scenes they trying to make me 2Pac  
Change my voice and my clothes like a new job  
We all wear masks like relationships  
Phantom Of The Opera, I remove it and it made them sick  
And bitches spread for the bread like Mayo Whip  
And I persuade? rappers just to make a hit  
In a room full of 'dro I don't take a hit  
Labels don't smell what I'm cooking, they don't make a cent/sent  
And I mean what I say I meant  
I deserve my spot like I paid the rent

Light, camera, action on the set  
I bet the beat dance is rented  
Yet I still Google eye the prize  
And recognize the ice and yearn for the security that it comes with  
Confidence, prominence, adulation, it don't make sense  
The sins of the human I'm an alien  
Apparel narrows down the arrows pointing down

But I never wanna hit the ground  
Had Cloverfield flow when I hit the town  
In the sense of my senses were alienated  
Let the XV be alienated  
Stand strong, cause maybe I made it  
Easy for people who believe me and waited  
For a change like Obama campaigning

Popping video games in instead of champagne and  
My right mind, I'm left field, Jason Bate  
Tip the scales for the real, nigga wait/weight  
Don't make a move in the game they play  
Lose all your pieces and in the end they gonna say...
