

**DIM****SYML**

I lay next to myself, breathing slow  
Car crash in rewind  
"There's nothing you could have done", said a soft voice  
"Calm down, you will survive"

Leave me out of my mind, sedated  
Bitter and blurry-eyed  
Please don't look me in my face when I'm wasted  
You know you can't relate

And the world got a little more dim tonight (Whoa-oh-oh)  
The world got a little more dim tonight (Whoa-oh-oh)  
Though you had to go, I won't forget your light  
The world got a little more dim tonight (Whoa-oh-oh)

Days come just like our friends with the soft glow  
The one touch that slowly fades  
You're just out of my reach, oh, in the shadows  
Still young but weathered grey

And the world got a little more dim tonight (Whoa-oh-oh)  
The world got a little more dim tonight (Whoa-oh-oh)  
Though you had to go, I won't forget your light  
The world got a little more dim tonight (Whoa-oh-oh)

I will protect your light  
I will protect your light

Lay down with me tonight, breathing slow  
Back in your driveway  
Rest now, kiss me goodbye in the morning  
I'm with you always

And the world got a little more dim tonight  
The world got a little more dim tonight
